

Argumentation in science teaching and learning

WORKSHOP

07 Dec, 2023

15:30 – 18:00

Argumentation is about providing justifications for claims with evidence. How do we know that matter consists of particles or that day and night are caused by a spinning earth?

The workshop, mainly intended for **secondary school teachers**, will include **interactive activities and group discussions**. The session will model pedagogical strategies that support the teaching of argumentation and will include a brief presentation on some research findings from an interdisciplinary project conducted in the UK.

Sibel Erduran is a Professor of Science Education at University of Oxford (United Kingdom) and Fellow at the American Educational Research Association.
